This estimate is based on our inspection and does not cover additional parts or labor that may be required after the work has been started. Occasionally, worn or damaged parts are discovered that were not evident on the first inspection. Therefore, the above prices are not guaranteed. Parts prices subject to change due to manufacturer's price increases.

**BE SURE TO SHOW THIS ESTIMATE TO THE INSURANCE APPRAISER WHO INSPECTS YOUR VEHICLE.**

You have the right to have your vehicle repaired at the shop of your choice, and you do not have to get more than one estimate. If the insurance company tries to steer you to another shop, or tells you to get more than one estimate, please let us know immediately!

The insurance company can not require you to take your car to a drive-in claims center to have them look at it. You may arrange to meet the appraiser at our shop, or you can have the appraiser come to your home or work place.

**SECOR'S COLLISION TECHNOLOGY INSURANCE COMPANY REFERRAL LIST**

When choosing an insurance company, there are other things to consider beside premium costs. Saving a few dollars on your premium may cost you hundreds or thousands of dollars when it comes time to actually use your insurance. If your insurance company uses unfair practices, or refuses to pay the necessary costs to repair your vehicle properly, the premium savings become worthless.

Below is a list of insurance companies that we find fair, easy to work with, and treat their customers well. If an insurance company is not on our list it doesn't necessarily mean they are a bad company. It may mean that we haven't dealt with them enough to recommend them. And just because they make the list doesn't mean they are the perfect company. Personnel changes are constant, and it is the people who shape your experience with an insurance company.
